Electroencephalogram (EEG) Report

Patient	basic report	EEG Scope	Settings
Gender	Sex	Sample Rate	200
Age	number	Low Freq Filter	filter
Diagnosis	very short	High Freq Filter	filter

here the main report text

1. After writing:

Save as new report --> each time you click "Save as new report" you create a copy of same report

If you already have a report created and want to change it, just rewrite some text and click "Save changes before closing".

2. To create a new report: click on clear all fields, create a new "Patient" text and "Save as new report" , edit it as needed and "Save changes before closing".

3. To find report created after closing: go to "Report List", select databank in dropdown
